

INzone – The Greater Indianapolis Foreign Trade Zone

INzone is the not-for-profit administrator of the federal Foreign Trade Zone program in 41 counties in Central Indiana. It is an incentives program available to any business in the area and is designed to enhance foreign trade through savings and improved efficiency.

Foreign Trade Zone Advantages

Foreign Trade Zones are specific physical areas that have been granted special status by the Federal Government, allowing companies to import, manipulate, and/or manufacture goods while delaying, reducing or eliminating customs duties, among other benefits. Foreign trade zones can be established on-site at any company that wishes to participate in the program and receive these benefits. Some Central Indiana companies that have previously established foreign trade zones include Eli Lilly & Company, Ingram Micro, Rolls-Royce, Endress+Hauser, and many others.

In addition to being the administrator for all of Central Indiana, INzone also operates its own foreign trade zone at the Indianapolis International Airport (FTZ #72). This additional service helps businesses access program benefits if they are unable to operate their own foreign trade zone. Services offered on-site include: climate controlled warehouse, third-party logistics, repackaging/ relabeling, CBP-compliant inventory control software, transportation coordination, quality control services and import/export services.

Because all Central Indiana counties are part of the new alternative site framework and have been pre-designated as foreign trade zones, any interested company is able to establish an on-site foreign trade zone much more quickly and efficiently within these counties than in other areas of the country that are not part of the framework.
