

Innovators Challenge

OVERVIEW

Each year #IndyCivicHack throws caution to the wind and gathers all data sources together to see what innovative ideas our participants can create. This year is no exception. You'll have only 24 hours to create and present your innovative idea, so make it a good one! Use the available State and City data resource links on indychamber.com/hack to get started.

Here's your one and only rule: make sure to tie your innovative idea back to our hackathon theme of food security.

We look forward to your creativity!
